

for your information PARKING PROCEDURES & RULES

Surface Lot

All vehicles parked on the surface lot are required to have a parking permit affixed to the windshield. The permit should be placed in the lower corner of the drivers side. This is **enforced from 7pm-7am**. Vehicles without a permit displayed will be towed at the owners expense. The purpose of the permit system is to make parking as easy and convenient as possible for residents of Graystone Heights.

Have a guest coming to stay? Please contact the office during business hours to request a **free guest parking permit**. Please remind your guests that they will need to have their permit displayed in their windshield during the hours of 7pm until 7am or their car may be towed at their expense.

All vehicles without a resident or guest permit should be parked on the street.

Garages & Underground Parking

A great way to avoid searching for parking spaces or scraping your windshield is to reserve either a heated underground parking space or a private garage! Please contact the office during business hours to reserve your space today.

The underground garages can be accessed through the garage doors on the West side of the complex. There is a door for the North garage and the South garage. To enter, simply scan your key fob on the yellow post. After parking, you can ride the elevator directly to your floor.

If you have a paid parking space, please park in it to leave room for other residents on the surface lot.

Questions or concerns?
